RE: Docket # 2007-41-W

Mr. Terrini,

There is desperation and an urgent need of getting water to the Ashley Oaks community. The community wells operated by the Ashley Oaks Water System, Inc, are constantly going dry, causing pressure problems, air in the water lines, along with not being able to flush toilets, to take baths, to do laundry, to run the dishwasher, etc. And with the drought so far this summer the community may end up with no water supply at all. Therefore, the motion by Ms. Bobbie Young to delay/postpone the transfer of the Ashley Oaks Water System to the City of Columbia needs to be denied. The City of Columbia needs to take over ASAP or we will all be without water to proceed with the daily tasks of our very busy lives.

Sincerely,  
Cara Hodson
